

Trouble hearing?

Having trouble hearing in some situations?
Then it's time to have a look at what Domino has to offer.

At home. Is it hard to follow the conversation when chatting with friends and relatives?

At work. Do you have trouble hearing what's being said at meetings or seminars?

At school. Do you find it difficult to hear what your teacher is saying in class?

In restaurants. Do you have trouble participating in discussions in loud and busy restaurants?

In the car. Do you really need to focus to hear in noisy environments, like in your car?

Watching TV. Do you miss words when watching TV at normal volume?

This is the solution

Superior sound. Bellman Audio Domino is a revolutionary personal hearing system that uses digital state-of-the-art sound processing and wireless wideband technology to bring out speech in difficult listening situations. Domino delivers crystal-clear stereo sound, free from background noise and feedback, and with no risk of eavesdropping.

Whether you only have trouble hearing from time to time or are already using a hearing device, it will make a big difference in your daily life.

Easy to use. Domino's unique design makes use very intuitive. All common features can be accessed with a single push of a button, eliminating complicated menus.

High quality. Domino is designed by Bellman & Symfon of Sweden and comes with a two-year worldwide warranty.

Bellman® Audio Domino

The difference.

Discover how Domino can improve your hearing in everyday life.

Features that matters

High-Definition Audio

Domino uses all-digital technology to stream audio in full stereo. The result is crystal-clear stereo sound with outstanding clarity and definition.

Wireless Secure Encryption

Domino uses state-of-the-art digital encryption technology, resulting in interference-free speech, absolutely impossible to eavesdrop.

Global Frequency Standard

Domino uses the 2.4 GHz global frequency standard. This means you can use your Domino system anywhere in the world.

Easy Connect

Domino is ready for action with the touch of a button, and you can just as easily connect it to your TV, stereo system or MP3 player.

Remote Zoom

Both transmitter and receiver are equipped with omnidirectional and directional microphones that you can easily control from your receiver unit.

Worldwide Warranty

Domino is designed by Bellman & Symfon of Sweden and comes with a two-year worldwide warranty.

How Domino works

The Domino system consists of a transmitter and a receiver, equipped with state-of-the-art microphones.

How it works. Sound is picked up by the transmitter and receiver microphones and converted into digital data. Speech is clarified and annoying background noise is eliminated. The sound is then streamed over an encrypted wireless radio link from the transmitter to the receiver. The transmitter also incorporates a stereo input for streaming high quality audio from your TV, MP3 player or stereo system.

Maximum control. The receiver amplifies sound and sends it to your headphones, earphones or neck loop. From the receiver, you can easily control the functions of the two units.

At work

Are there sometimes intense discussions around the conference table? When more than one person speak at the same time, the ability to hear what is being said can be negatively affected.

Domino helps you to hear speech in a larger area and you can easily place a microphone near the sound source. For additional noise reduction and clearness of speech, just point the transmitters microphones to the person you want to hear and enable directional microphones from your receiver unit.

At school

Are you sitting in the back of the classroom? Even if your teacher is far away, you can with Domino experience the sound as if she were sitting next to you.

The digital radio transfers the sound from the lecture holder to you, noise free and with crisp and clear sound. If you want to communicate with you schoolmate beside you, simply enable the push to listen function to also pick up sound from your close environment.

In restaurants

Restaurants are places where people not only eat, but also spend time together. A lot of conversation together with music playing in the background can cause difficulties to follow conversations with your own party.

Domino's directional microphone strategy lowers the noise around you and focuses the sound so you can hear the wanted sounds and attend in the discussion with your friends at the table.

In the car

Travelling by car is one of the hardest sound environments to conduct a conversation in. Besides the noise from the road, wind and engine, passengers are normally facing forward and it makes it almost impossible to hear well while sitting in the back seat.

Simply place the Domino transmitter on the person you want to hear and experience the improved speech intelligibility.

At home

Connect your Domino transmitter to the TV and sit back and enjoy perfect sound in full stereo. There is no longer a need to increase the volume on your TV, which may cause irritation from your partner or neighbours.

When you want to discuss the film with your partner, you can easily mix the sound from the TV with the internal microphones on the receiver.

The package.

A complete package that includes everything you need.

All inclusive

Whether for your own use or as a gift, Domino comes with everything you need, all wrapped up in a luxurious package. Choose Domino as your personal hearing system and discover how easily you can improve your hearing.

In the box

- Transmitter unit
- Receiver unit
- Exclusive travel case
- Stereo Earphones
- Tie-clip microphone
- Cable kit
