LEVITON®

Decora Smart with Z-Wave Plus Technology

Complete Solution for Your Hub

The Decora Smart with Z-Wave Plus Technology family of products feature six devices including in-wall dimmers, a switch, receptacle, fan speed controller, and plug-in modules. The newest devices, the ZW4SF and ZW15R, utilize the latest 700 Series Chip generation of technology for advanced wireless lighting control products with features like S2 security and SmartStart.

Leviton devices support a wide range of load types including LED, CFL, and incandescent amongst others at various wattages with multi-way capability for large rooms or hallways. The products are Z-Wave Plus certified, ensuring increased communication range, network wide inclusion, and over the air updates.

The highly advanced design features two-way feedback, is scene capable, and is supported by security systems, hubs, and gateways that are Z-Wave enabled which provide remote access and scheduling.

In-Wall devices and switches feature true rocker action, pressing the top to turn on and the bottom to turn off. For dimmers and fan speed controllers, the dim/brighten bar is conveniently located along the right hand side of the paddle, ensuring ease of use with the state-of-the-art device. Vanishing LEDs to the left of the paddle show current and target level with real-time feedback. To meet any decor, color change kits are available in white, ivory, light almond, gray, black, and brown. For the most professional and cleanest installation, pair the device with an optional Leviton screwless wallplate.

**ZWAVE PLUS**
