“

Introducing the world's first wireless sensor with Bluefield™ technology.

VERSA MINI

The Versa Mini is a compact, wireless security contact that can be installed on windows, doors and many other objects that open and close. It is the perfect sensor for use at home or work while offering a sleek design for all major wireless security systems.

→ BLUEFIELD™ TECHNOLOGY

The Versa Mini is the world's first wireless sensor with Bluefield™ technology. Bluefield™ is a magnetic field LED indicator that illuminates when a magnet comes within range of the sensor.

For the first time an installer can see the magnet gap and no longer has to rely on the chime of a control panel. Installing security has never been faster, easier and more reliable.

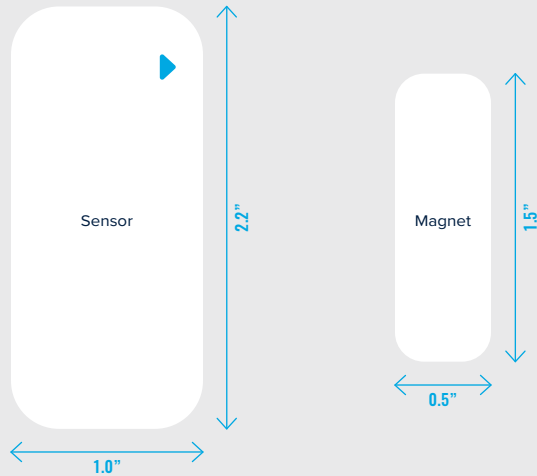

SLIDE COVER DESIGN

Our new cover design makes changing out the cover easy. Simply slide off the lid to switch out the cover color or replace the battery. Lock it back into place with one simple click.

SIZE & WEIGHT

SENSOR DIMENSION	1" x 2.2" x 0.25"
MAGNET DIMENSION	0.5" x 1.5" x 0.25"
WEIGHT	0.4 oz

FEATURES

BATTERY	1 Panasonic CR2032, 3VDC, 225mAh Lithium Coin Cell (replacable)
BATTERY LIFE	5+ Years (typical)
MAGNET TYPE	Rare Earth
WARRANTY	2 Year
UNIQUE ID CODES	16 Million
INDICATOR LIGHT	Bluefield™ LED, Signal Transmission, Low Battery, Magnet
RF FREQUENCY	319.5 MHz, 345 MHz, 433 MHz
TRANSMISSION RANGE	500+ Feet
TAMPER	Case Tamper
OPERATING TEMPERATURE	32°F (0°C) - 122°F (50°C)
REGULATORY APPROVALS	FCC, IC, UL, ULc
SUPERVISORY SIGNAL	Yes
COVER COLOR	White, Brown

COMPATIBILITY

VERSA-2GIG	2GIG 345 MHz
VERSA-DSC	DSC 433 MHz
VERSA-GE	GE I Interlogix I Qolsys 319.5 MHz
VERSA-H	Honeywell
